

**Dingwall ASC**  
**Return to Training Meeting**  
**14/06**

**Attendees:** Andrew Clark, Jordan MacDonald, Rachel Thomson, Nicole MacLeod

**Presentation attached.**

**AC took the coaches through a first draft of the Return to Training presentation. Discussed what a return to training might look like but conceded that the situation is changing every day and that we may have to adapt our strategy as we move forward.**

**Will involve lots of discussion with the Leisure Centre, Committee and our members/parents.**

**RT:** Echoed Andrew's concerns about the situation changing and that some parents might be hesitant to bring their children back to the water.

**AC** conceded that he is aware that some swimmers may not return to training once we are allowed to resume.

**RT** also mentioned that having all swimmers return at once is the best case scenario but that it depends on individual parents.

**All** commented that the 1<sup>st</sup> Training Option discussed would be problematic for some parents however **AC** said that whatever we decide, given the severity of the virus and the need to maintain social distancing/follow government advice, we must be steadfast in our decision and not allow chopping and changing between groups.

**JM** suggested that we perhaps take all of A/B Squad back and use all training sessions available to us.

**RT** suggested that the Club and the Coaches should be aware of swimmers with underlying health conditions and suggested that they are not brought back too soon.

**AC** to look into sending out a form for parents to update their child's information including medical

**RT** urged that parents must be honest with us.

**All** agreed that it is a fast evolving situation and that we should keep all options on the table. Once we begin to move through the phases of lockdown we will have a clearer picture of what a return to training might look like.

**RT** agreed that PPE (face coverings) should be worn on poolside.
